

UCMR 4 Pre-Preserved®

Under the Unregulated Contaminant Monitoring Rule 4, public drinking water suppliers (with over 10,000 customers) must test to these parameters.

- ESS was the company that introduced Pre-Preserved® containers to the Environmental/Analytical market
- ESS is experienced in previous UCMR program requirements
- ESS was the first container company in “full” GHS/OSHA labeling requirements for shipping Pre-Preserved® containers
- ESS developed Cap Sure®—economical, leak-proof HDPE containers perfectly suited for the Environmental/Analytical market

Several methods require complicated chemical preservation combinations. You can trust ESS for your most sensitive container needs!!
